Areas of concern with methanol-blended fuel

1. Transportation
- Atmospheric oxygen + condensed water + corrosion

2. Storage of blended fuel
- Groundwater + contaminants
- Phase separation + corrosion + contaminants enter

3. Filling up with fuel
- Degradation of hose + deposits enter car

4. Compatibility with vehicle-fuel system
- Corrosion and deposits over entire engine-fuel system
- Fuel line: vapor lock
- Fuel tank: phase separation + corrosion + less mileage
