**NOTES:** Percent of new vehicles based on 2018 registrations from IHS Markit. City registrations are estimated according to city share of metropolitan area population. Registration data available only for 50 U.S. states. Cities labeled on the map are the 30 largest cities by population and exclude cities in identified states. List updated as of April 15th, 2019. In combined accounting for cumulative new vehicles for states and cities, the sum of 60% does not include cities that are in the clean car states, so as to not double count.
