

# Areas of concern with methanol-blended fuel

## 1. Transportation

Atmospheric oxygen  
+ condensed water  
+ corrosion

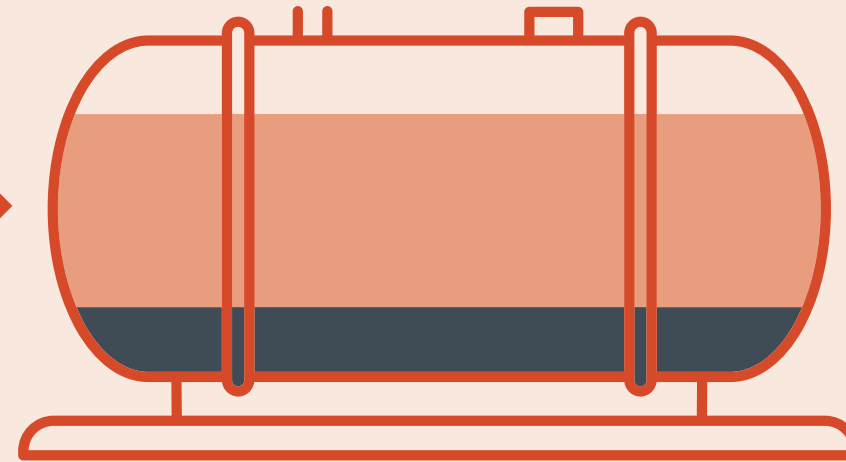

Groundwater  
+ contaminants

Gas pipeline

## 2. Storage of blended fuel

Phase separation + corrosion  
+ contaminants enter

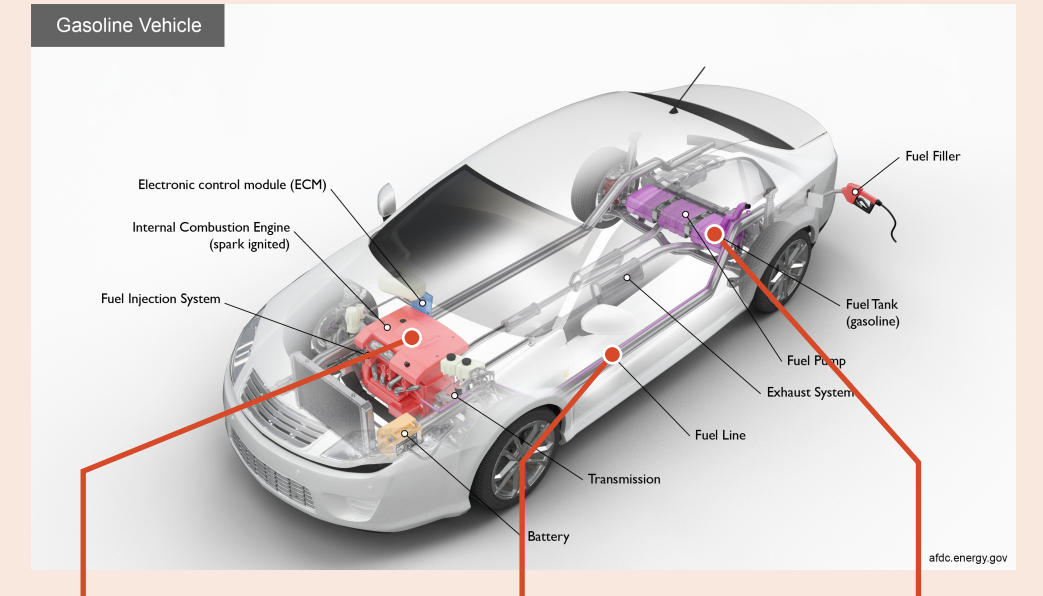

## 3. Filling up with fuel

Degradation of hose  
+ deposits enter car

## 4. Compatibility with vehicle-fuel system

Corrosion and  
deposits over entire  
engine-fuel system

Fuel line:  
vapor lock

Fuel tank:  
phase separation  
+ corrosion  
+ less mileage
