

Vehicle emissions in London's Ultra Low Emission Zone

Vehicle emissions are a **major contributor** to urban air pollution.

In metropolitan London in 2015,* air pollution from transportation sources was linked to **1,500 ANNUAL PREMATURE DEATHS.**

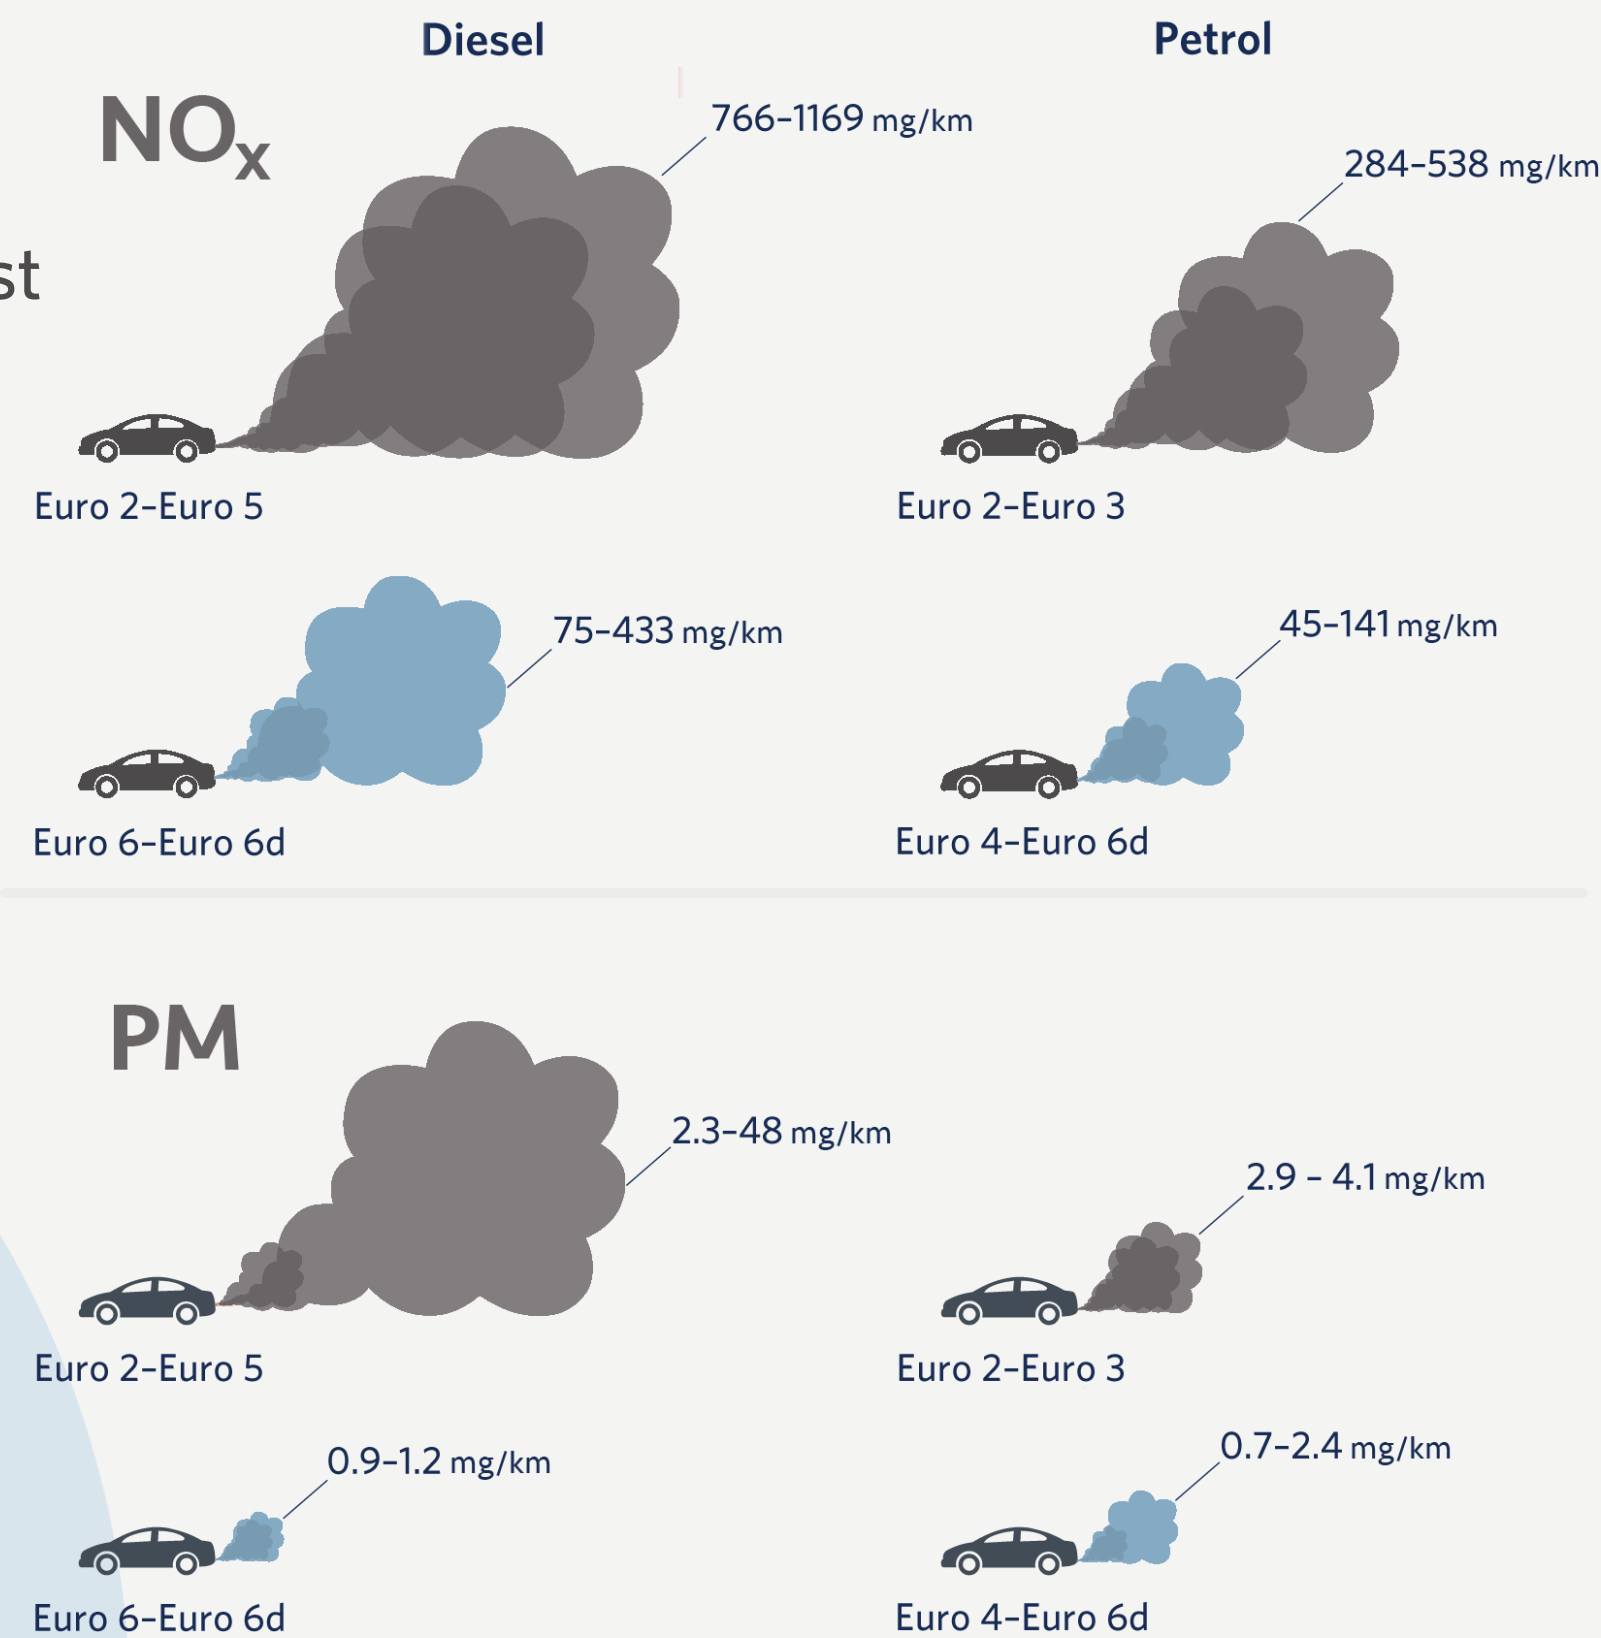

*Latest available data

London's Ultra Low Emission Zone (ULEZ) regulates access of passenger vehicles in the city as a way to reduce pollutant emissions.

ULEZ requirements impact those vehicle groups with the highest real-world NO_x and PM emission levels.

ULEZ Compliant 
Not ULEZ Compliant 

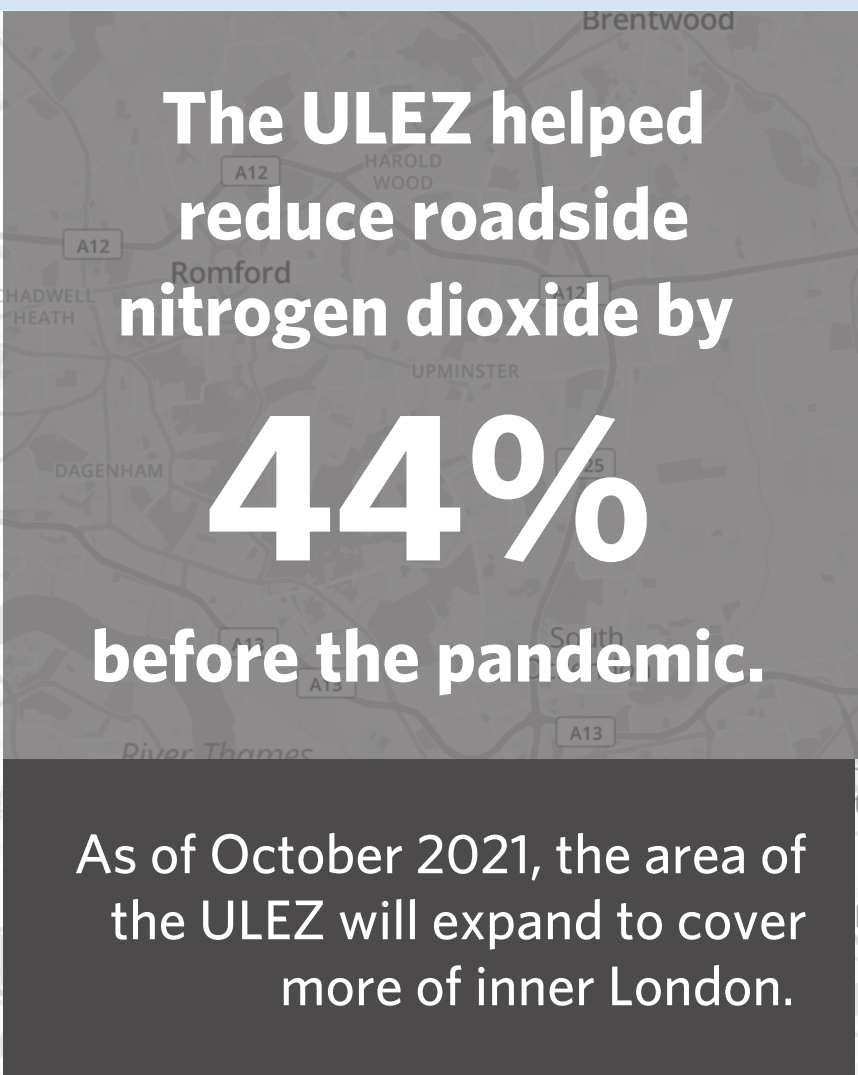

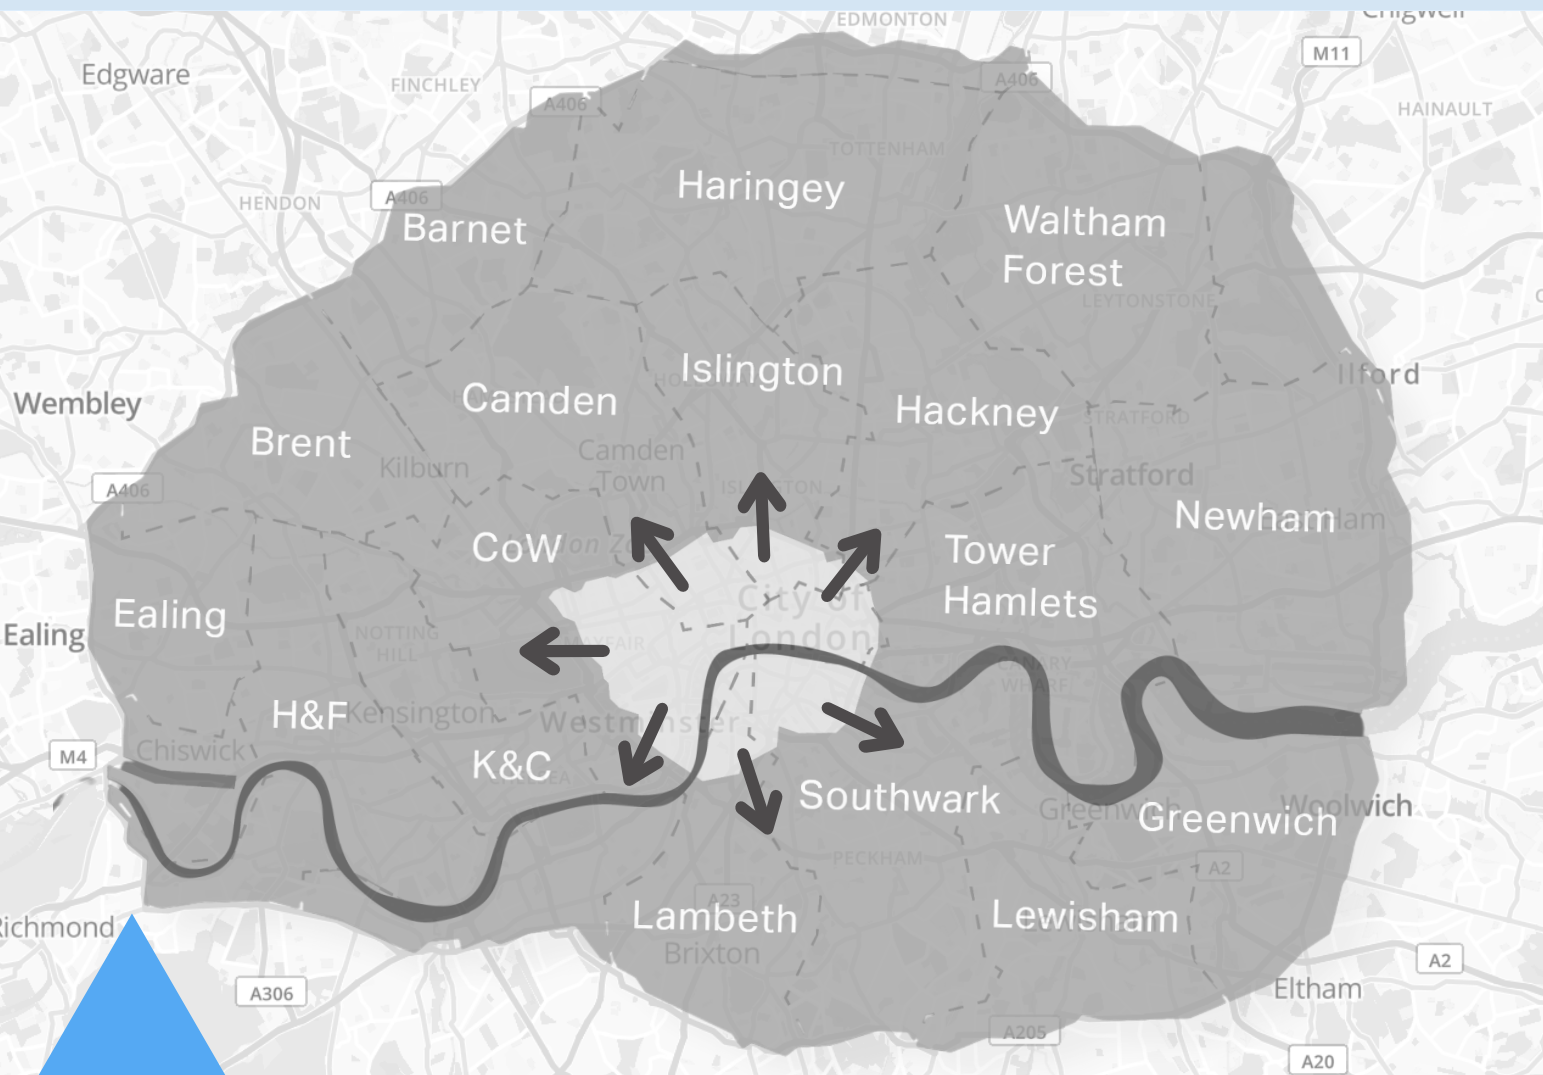

Just replacing a diesel car that does not meet ULEZ standards with a new Euro 6d diesel car would result in:

90%-94%

REDUCTION IN NITROGEN OXIDE EMISSIONS

61%-98%

REDUCTION IN PARTICULATE EMISSIONS
