

Accelerating Battery-Electric Vehicles: Indonesia National Workshop

Wednesday, 21 September 2022
09:00 – 16:30 WIB (UTC +7)

AGENDA

The International Council on Clean Transportation (ICCT) in partnership with Komite Penghapusan Besin Bertimbel (KPBB) is conducting a national workshop on Accelerating Battery-Electric Vehicle Adoption in Indonesia. The Government of Indonesia has incentivized the acceleration of electric vehicles (EVs) through the adoption of EV targeted policies. A complete transition to zero-emission vehicles to meet future net-zero emission targets requires strong government policies and private sector engagement. ICCT and KPBB offers this workshop as part of our support for Indonesia's transport electrification and to discuss EV progress across all segments in Indonesia.

Objective and scope

Participants in the workshop will receive updates related to EV progress in Indonesia and identify new policy windows to further accelerate the transition.
